

TATTOO AFTERCARE – FABRIC TATTOO IBIZA

TATTOO AFTERCARE - FABRIC TATTOO IBIZA

Proper hygiene is essential for good healing and a beautiful result. Please follow these aftercare instructions carefully.

We use two aftercare methods - depending on your artist:

1. PLASTIC WRAP

- Remove the wrap carefully after 1 to 3 hours.
- Wash the tattoo with lukewarm water and mild antibacterial soap.
- Pat dry with a clean towel or let it air dry.
- For the first 3 days: only wash it 2-3 times a day.
- From day 4: apply a thin layer of tattoo cream after each wash (2x/day, for 4 weeks).

2. SECOND SKIN

- Leave the second skin on for 5 days.
- Remove under the shower by peeling a corner and stretching the film.
- Wash as above and pat or air dry.
- Then: apply tattoo cream 2x/day for 4 weeks.

GENERAL ADVICE

- Never rub or scratch!
- Always apply cream with clean hands.
- Wear clean cotton clothing (avoid wool, denim, or fuzzy materials).
- No bandages or plasters.
- Showering is fine, but avoid direct water on your tattoo.
- Keep soap, shampoo, and lotion off the tattoo.
- Avoid sun exposure for 4 weeks - this prevents scarring.
- Extreme redness, swelling, bleeding, or pain? Contact a doctor.
- Light spots after healing? Touch-up is free within 3 months if you followed proper aftercare.
